

DIABETES IN USA

BY JAHIR MIAH , ABIGAIL SIXTO

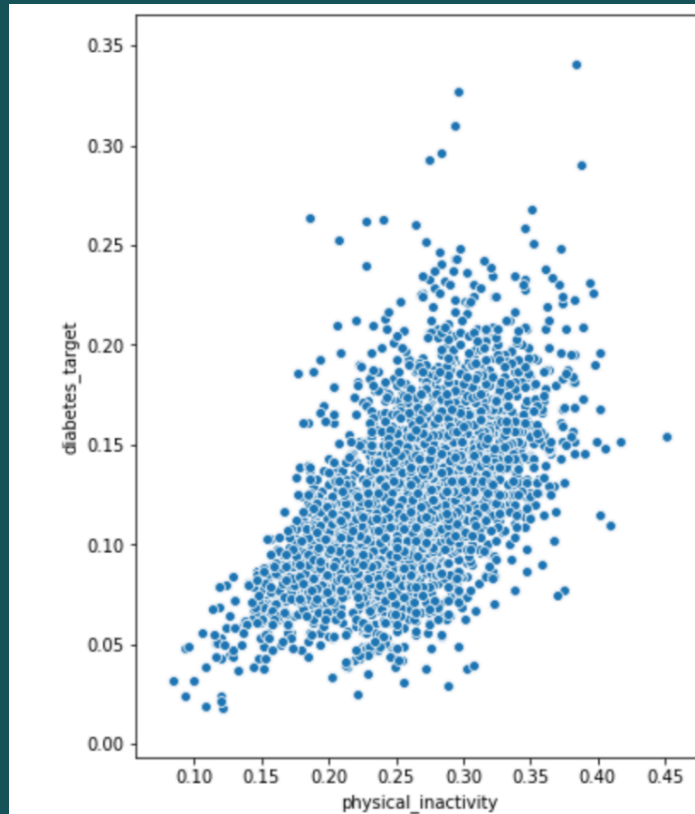

DIABETES FACTS

- ▶ Diabetes is the nation's seventh-leading cause of death
- ▶ 34.2 Million in USA have diabetes (1 in 10 people)
- ▶ 88 Million have prediabetes (1 in 3 people)
- ▶ Three types of diabetes : Type 1, Type 2 and gestational.
95% of diabetes is type 2 and it is preventable

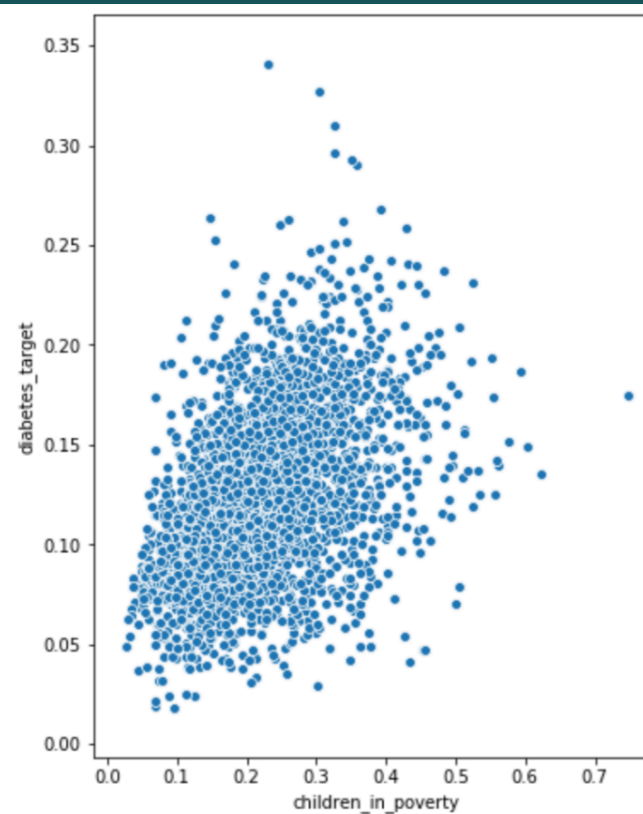

PERCENTAGE OF DIABETES BY STATE

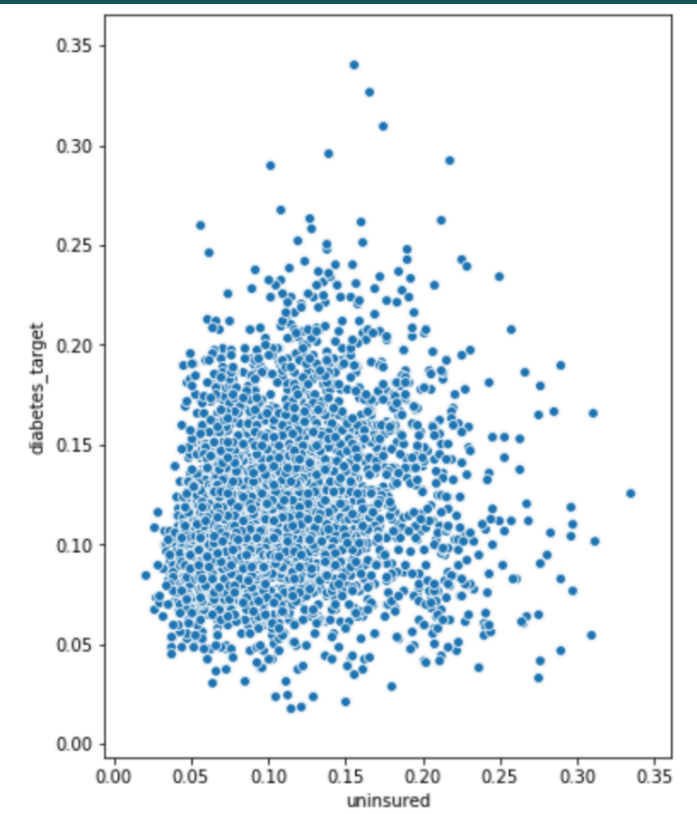

TOP MOST INFLUENTIAL FACTORS IN DIABETES

Physical Inactivity

Children in Poverty

Uninsured

- ▶ Areas of high diabetes are characterised by high levels of inactivity, high levels of poverty as indicated by two of our main factors : children in poverty and uninsured people
- ▶ For every 1% of the population that became active the proportion of diabetic population will fall by 0.35%

RECOMMENDATIONS

- ▶ Strategies to tackle physical inactivity
- ▶ Strategies to reduce child poverty
- ▶ Strategies to extend medical cover to uninsured people
- ▶ There are already government policies to address these issues but our recommendation is to focus more on physical inactivity

Q&A

Thank you!!!
